# Tailored air distribution solution for maximum comfort of employees

We know that working conditions in manufacturing and production companies might not be the easiest, which is why it's so important to maintain high air quality and employee comfort. With fabric-based air distribution systems, you'll not only protect your product, but also the health of your employees.

## **EVEN AIR DISTRIBUTION**

- Evenly distributes air throughout all the manufacturing lines.

## **EASY INSTALLATION**

- Installation is easy and can be done without stopping production.

## **LONG LIFESPAN**

- Proven durability for decades to come.

## **CORROSION RESISTANT**

- Fabric does not rust, so your products are safe from corrosive drips.

## **IMPACT RESISTANT**

- Ducts are flexible and can maintain their shape even after accidental bumps.

## **CLEANROOM CERTIFIED**

- Our fabric is rated for cleanrooms and associated controlled environments.
